

CONSULTING & FREELANCE SOFTWARE

Invoicing software built for how a consultant actually bills a client

Most invoicing tools force a services-only business to stare at inventory screens they'll never use. Consulting mode turns all of that off — what's left is a clean, fast invoice for the work you actually bill, in whichever currency your client pays in.

How it works

- 1 Set up the engagement**
Create a Project for the client's work, billed at a fixed price or an hourly rate per project, task, or person.
- 2 Log time as you work**
Track hours against the project as they happen, at the rate already set.
- 3 Invoice from logged time**
Generate the invoice straight from the timesheet — no manual re-typing of hours worked.
- 4 Bill in the client's currency**
International clients are billed correctly, with the right decimal handling for their currency.
- 5 Send a professional document**
Choose from four print templates, so the invoice looks as considered as the work itself.

Key capabilities

• No inventory clutter Stock and purchasing screens stay off entirely — just customers, estimates, and invoices.	• Multi-currency billing Bill international clients correctly, with the right decimal handling for their currency.
• Professional templates Four print styles to choose from, so your invoice looks as considered as your work.	• Project-based billing, from logged time Set up a client engagement as a Project, log hours as you go, then generate the invoice straight from the timesheet — at a fixed price, or an hourly rate per project, per task, or per person.
• GST-ready billing Turn on GST billing and every printed invoice applies the correct tax treatment automatically, for clients who need it.	• Clean client history Every past invoice and estimate is on record against the client, with nothing extraneous cluttering the view.

AI features included with every plan

• AI Receipt & Bill Scanning Photograph a bill and the amount, date, and items fill themselves in.	• Voice & Text Invoice Entry Say or type what you're billing for - the invoice fills itself in.
• AI Invoice Error Detection Catches likely mistakes - a missing GST field, an unusual amount - before you save.	• AI GST Assistant Ask a plain-language question, get an answer grounded in your own GST setup.
• AI Business Forecast Real revenue and cash-flow projections from your own invoice history.	• AI Customer Insights A quick, honest read on each customer's payment and ordering pattern.
