

Invoicing software built for how a cafe actually bills a table

Every table order draws straight from the same kitchen and bar stock, so what you sell and what you have on hand should always agree. Invoice2Track bills food and drinks as line items on one invoice per table, deducts kitchen/bar inventory automatically as items are ordered, and closes out the moment the table asks for the bill.

How it works

1. Open the table

Start a table's invoice the moment the first order comes in.

2. Add food and drinks as they're ordered

Every item ordered during the visit bills as a line item on the same table invoice.

3. Stock deducts as it's used

Kitchen and bar items deduct automatically as they're billed, keeping counts accurate without a manual recount.

4. Print the bill

Print straight to a thermal receipt printer at the counter, or hand over a full A4 invoice.

5. Close out the table

One invoice covers the whole visit, settled the moment the bill is asked for.

Key capabilities

● Table orders, one invoice

Food and drinks bill as line items on the same table invoice, closed out the moment the bill is asked for.

● Repeat customer loyalty

Set up membership tiers with their own discount rates, applied automatically to enrolled regulars.

● Vendor purchasing

Track supplier purchase orders and history for kitchen and bar stock, restocked as it's used.

● Kitchen inventory synced

Stock deducts automatically as food and beverage items are billed, so counts stay accurate without a manual recount.

● GST-ready billing

Turn on GST billing and every printed invoice applies the correct tax treatment automatically.

● Thermal receipt printing

Print straight to a POS roll printer at the counter, formatted for a fast in-person sale.

AI features included with every plan

● AI Receipt & Bill Scanning

Photograph a bill and the amount, date, and items fill themselves in.

● AI Invoice Error Detection

Catches likely mistakes - a missing GST field, an unusual amount - before you save.

● AI Business Forecast

Real revenue and cash-flow projections from your own invoice history.

● Voice & Text Invoice Entry

Say or type what you're billing for - the invoice fills itself in.

● AI GST Assistant

Ask a plain-language question, get an answer grounded in your own GST setup.

● AI Customer Insights

A quick, honest read on each customer's payment and ordering pattern.
