

INTERIOR DECORATORS SOFTWARE

Invoicing software built for how a decorating project actually costs out

A decorating job runs on more than the invoice you send — it runs on what you actually spend to deliver it: contractors, vendors, materials, anyone paid along the way. Invoice2Track runs every client job as a project and lets every expense against it link straight back, so you see a project's real cost sitting right next to what it billed.

How it works

- 1 Set up the job as a project**
Create a Project for the client's job with the billing method that fits — a fixed price, or an hourly rate charged project-wide, per task, or per team member.
- 2 Log time as work happens**
Team members log hours against the project as they go, at the rate already set for their task or role.
- 3 Record every expense against the job**
Contractors, vendors, materials — every payment for the project is logged as an expense and linked straight back to it.
- 4 See the real cost building up**
The project's page totals every linked expense automatically, showing its true cost alongside what's been invoiced, without waiting until the end to find out.
- 5 Invoice from logged time**
Generate the client invoice straight from the timesheet — billed at the rate you've set, no manual re-entry of hours.

Key capabilities

• Client work as projects Set up each job as a Project with the billing method that fits — a fixed price, or an hourly rate charged project-wide, per task, or per team member.	• Expenses linked to the job Paying an employee, a vendor, or anyone else for a project — record it as an expense and link it straight to that job.
• See the real cost, not just the bill Every project's page totals every expense linked to it automatically, so its true cost is visible alongside what's been invoiced.	• Timesheets that turn into invoices Log hours against a client's job, then generate the invoice straight from the logged time — billed at the rate you've set per task or per team member, no manual re-entry.

- **GST-ready billing**

Turn on GST billing and every printed invoice applies the correct tax treatment automatically.

- **Multiple team members, one project**

Several people can log time against the same project, each at their own rate, all rolling into one client invoice.

AI features included with every plan

- **AI Receipt & Bill Scanning**

Photograph a bill and the amount, date, and items fill themselves in.

- **Voice & Text Invoice Entry**

Say or type what you're billing for - the invoice fills itself in.

- **AI Invoice Error Detection**

Catches likely mistakes - a missing GST field, an unusual amount - before you save.

- **AI GST Assistant**

Ask a plain-language question, get an answer grounded in your own GST setup.

- **AI Business Forecast**

Real revenue and cash-flow projections from your own invoice history.

- **AI Customer Insights**

A quick, honest read on each customer's payment and ordering pattern.
