

Billing and invoicing software built for how a class actually runs

A class isn't one booking, it's one instructor and many students at the same time. Invoice2Track lets you enroll as many students as your class's capacity allows, tracks attendance per student per session, and bills each student's tuition at the rate they enrolled at - not whatever the class happens to cost today.

How it works

1. Define the class

Set the name, instructor, days and time, capacity, and monthly fee once.

2. Enroll students

Add students up to the class's capacity - a class is built for many students at once, not one exclusive slot.

3. Lock in each student's rate

Every student's fee is set the day they enroll, so a later fee change never silently affects who's already signed up.

4. Track attendance

Mark Present, Absent, or Excused per student, per session date - come back and correct any date later.

5. Bill tuition and track collection

Generate each student's monthly invoice, and see exactly who's paid and who's outstanding for the period.

Key capabilities

- **Class enrollment, not exclusive booking**

Enroll as many students into a class as its capacity allows - built for a class having many students at once, not one booking per slot.

- **Attendance tracking**

Record Present, Absent, or Excused per student, per session date, with a clear attendance-rate view over any date range.

- **Class capacity at a glance**

See every class's current enrollment against its capacity, so you know exactly when a class is full.

- **Per-student tuition rates**

Each student's fee locks in at enrollment - a later change to the class's rate never silently affects students already signed up.

- **Tuition billing & collection tracking**

Generate each student's monthly invoice, and see at a glance who's been billed for the period and who hasn't.

- **GST-ready billing**

Turn on GST billing and every printed invoice applies the correct tax treatment automatically.

Frequently asked questions

Can more than one student be in the same class at the same time?

Yes - a class is designed to hold many students at once, up to whatever capacity you set for it. Enrolling a student never conflicts with another student already in the same class.

If I change a class's monthly fee, does it affect students already enrolled?

No - each student's fee is locked in on the day they enroll. Changing the class's fee later only applies to new enrollments.

Can I track which students showed up to each class?

Yes - attendance is recorded per student for each session date, and you can go back and correct or add to any past date.

How do I know which students still need to be billed this month?

The Tuition Collection report shows every enrolled student's billing status for the month you pick, so nobody falls through the cracks.

AI features included with every plan

- **AI Receipt & Bill Scanning**

Photograph a bill and the amount, date, and items fill themselves in.

- **AI Invoice Error Detection**

Catches likely mistakes - a missing GST field, an unusual amount - before you save.

- **AI Business Forecast**

Real revenue and cash-flow projections from your own invoice history.

- **Voice & Text Invoice Entry**

Say or type what you're billing for - the invoice fills itself in.

- **AI GST Assistant**

Ask a plain-language question, get an answer grounded in your own GST setup.

- **AI Customer Insights**

A quick, honest read on each customer's payment and ordering pattern.
