

SALON & SPA SOFTWARE

Invoicing software built for how a salon actually bills a visit

A salon runs on two things at once, same as a studio: appointments that need a slot and can't double-book a stylist or room, and repeat clients who deserve their tier's discount automatically. But a salon also sells product — shampoo, skincare — alongside the service, which a plain booking calendar was never built to handle. Invoice2Track checks every appointment against the calendar before confirming it, and lets a retail sale and a service sit on the very same invoice.

How it works

- 1 Book the appointment**
Reserve a stylist, room, or treatment slot, checked against the calendar before it's confirmed — nothing gets double-booked.
- 2 Serve the client**
Add the service as a line item, then any product used or sold alongside it — shampoo, skincare, whatever the visit includes.
- 3 Apply the member discount**
If the client's on a tier, their discount applies automatically the moment the invoice is generated — no manual lookup.
- 4 One checkout for everything**
Service and retail product bill together on the same invoice, not as two separate transactions.
- 5 Package fees renew on their own**
A client's recurring package bills itself on schedule, with no manual re-entry every renewal.

Key capabilities

• Appointment booking Book a stylist, room, or treatment slot with the same overlap-checking that powers gym and studio bookings — nothing gets double-booked.	• Membership tier discounts Gold, Silver, or any tier you define — the right discount applies automatically the moment a repeat client is billed.
• Retail product sales Shampoo, skincare, anything sold off the shelf — stocked with full inventory and vendor purchasing, billed as a line item right alongside the appointment.	• Recurring package billing Set a client's package once — weekly, monthly, or yearly — and it bills itself on schedule, no manual re-entry every renewal.
• GST-ready billing Turn on GST billing and every printed invoice applies the correct tax treatment automatically.	• Stylist & room scheduling Every appointment checked against a stylist's and room's existing bookings before it's confirmed.

AI features included with every plan

• AI Receipt & Bill Scanning Photograph a bill and the amount, date, and items fill themselves in.	• Voice & Text Invoice Entry Say or type what you're billing for - the invoice fills itself in.
• AI Invoice Error Detection Catches likely mistakes - a missing GST field, an unusual amount - before you save.	• AI GST Assistant Ask a plain-language question, get an answer grounded in your own GST setup.
• AI Business Forecast Real revenue and cash-flow projections from your own invoice history.	• AI Customer Insights A quick, honest read on each customer's payment and ordering pattern.
